# G-Ext Uv+ Panels

Endless possibilities... G-Ext® UV+ exterior decorative panels brings compelling aesthetic and nearly limitless design possibilities to next-generation architectural claddings. With its smooth, seamless and non-porous surface, G-Ext® decorative panels are easy to clean and it takes longer for to accumulate dirt and thus they are easy to maintain. With durability, longevity and safety G-Ext® UV+panels are very durable and resistant to mechanical or physical stress such as bending, impact, cracking and scratching without losing its ability to be easily processed with sizing, drilling and engraving tools. In addition, G-Ext® UV+ is highly durable to environmental exposure, such as

sunlight, heat, moisture and other atmospheric chemicals which ensures structural integrity and color stability. When required, G-Ext® UV+ panels can be produced with enhanced fire retardant and fire resistant capabilities. When encountered with fire, the material does not enflame easily and no melting, burning droplets, explosion, or toxic gas emissions happens during fire exposure. Without compromise on health and environment. None of our surface materials contain highly toxic substances such as asbestos and chlorine and all production is highly regulated and constantly audited in order to maintain accordance to most current European regulations on emissions.

## GENTAŞ ENVIRONMENTAL DECLARATION

### GENTAŞ OPERATIONAL MEASURES FOR IMPROVEMENT OF ENVIRONMENTAL PERFORMANCES

The production process of "GENTAŞ" laminates has been adapted to the environment thematic.

New and strict regulations had been adopted to ensure a continuous improvement of the environmental performances.

The purity of the air and of the water is being efficiently protected in the production department area.

All the gases from the impregnation and pressing machinery are absorbed and eliminated in a special steam boiler. This important process is controlled by our Technical Manager and supervised by government authorities.

The residues resulting from the production are efficiently treated in the factory area.

As another part of GENTAŞ care for the environment, all the raw material used for the production of the laminates are purchased only from suppliers

who are in environmental performances needed. possession of ISO 9002 and Kraft papers only from FSC certificated producers. Our Kraft paper contains an important percentage of recycled paper (around 20%) and our decorative papers do not contain any of the following materials:

- Cadmium
- Chrome Hexavalent
- Lead
- Mercury
- Polybrominated Biphenils (PBB)
- Polybrominated Diphenylether (PBDE)

No efforts will be spared by GENTAŞ to continue the implementation of all the necessary actions to achieve the best

We are a Fsc certified laminate producer. We added respect to the nature to the

quality of our products. FSC had certified that our laminate products has been manufactured from the sustainable managed resources and submitted for your use.
